ASSET ALLOCATION

FUND DESCRIPTION

This fund invests mainly in equities, including developed and emerging markets and also low volatility equities. There are additional allocations to alternative investments and property and fixed interest investments. The fund also includes several risk management strategies. Investors in this fund are looking for good investment growth over longer time periods and are comfortable with the investment risk associated with this which may mean falls in capital values over shorter time periods.

Warning: If you invest in this product, you may lose some, or all, of the money you invest.

RESPONSIBLE INVESTING

Our approach is making the difference today to deliver a better, more sustainable tomorrow.

For more information about our approach to Responsible Investment, please refer to:

<https://www.ilm.com/responsible-investing/>

The assets in this fund may be used for the purposes of securities lending in order to earn an additional return for the fund. While securities lending increases the level of risk within the fund it also provides an opportunity to increase the investment return. External asset managers may change over time. Underlying funds or investments may be subject to incentive fees. Part of this fund may borrow to invest in property. Non euro currency exposures may be fully or partly hedged back to euro to reduce foreign currency risk. High Yield Bonds are sub-advised by an external manager.

This fund is provided by Irish Life Assurance plc and is managed by Irish Life Investment Managers. It is selected by your financial advisor to meet the needs of a specific client risk profile.

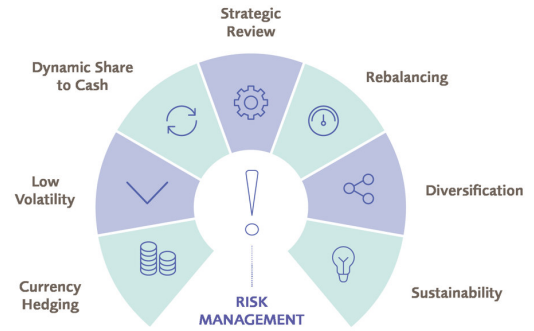

Warning: This fund may be affected by changes in currency exchange rates.

Warning: The value of your investment may go down as well as up.

RESPONSIBLE INVESTING KEY CHARACTERISTICS

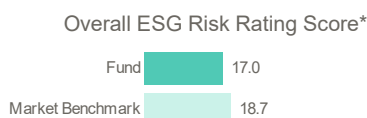

RESPONSIBLE INVESTMENT APPROACH

In line with the overall fund objective, the fund targets investment in strategies which help contribute to achieving its sustainability goals.

This involves selecting strategies which exclude or reduce exposure to companies with poorer sustainability characteristics and increasing exposure to companies with better sustainability characteristics. Sustainability characteristics are also considered in the selection of property and alternative funds.

ESG RISK RATING

The Environmental, Social & Governance (ESG) Risk Rating measures the degree to which a company's economic value is at risk due to not considering ESG factors using a calculation of the company's unmanaged ESG risks.

*A lower score indicates a lower level of unmanaged ESG risk and potential risk to the economic value.

Sustainalytics' ESG Risk Ratings measure a company's exposure to industry-specific material ESG risks and how well a company is managing those risks. This multi-dimensional way of measuring ESG risk combines the concepts of management and exposure to arrive at an absolute assessment of ESG risk. Sustainalytics identifies five categories of ESG risk severity that could impact a company's enterprise value.

Negligible	Low	Medium	High	Severe
0 - 10	10 - 20	20 - 30	30 - 40	40+

CARBON INTENSITY

Carbon intensity is a metric used to compare company emissions across industries. The absolute emissions is divided by total earnings with the figure expressed in tonnes of carbon dioxide equivalent per million USD of total revenue.

FOSSIL FUEL

Fossil Fuel Involvement measures the percentage of earnings that companies get from thermal coal extraction, coal-based power generation, oil and gas production, oil and gas based power generation, and oil and gas related products and services.

Note on Calculation of Sustainability Characteristics:

ESG metrics data sourced from Sustainalytics (Powered by Sustainalytics).

ESG risk scores and carbon metrics are currently calculated for Shares and Corporate Bonds only which represent 60.8% of the total portfolio. This reflects the majority (but potentially not all) of the Global Shares and Corporate Bonds in the portfolio.

Information is correct as at 31 March 2026.
